# MORE INFORMATION

## NETWORK EVENTS

6 half-termly networking events held at the end of the school day. These will be an opportunity to build your personal network of local colleagues across Devon and Cornwall, hear some of the latest news and opportunities from the region and to explore some relevant best practice.

## BESPOKE SCIENCE CPD

This course will be specifically crafted for groups of schools who have identified similar priorities, bringing together likeminded practitioners who can learn and overcome challenges together. Each course consists of 1 full day (or equivalent) of CPD, with a fully supported wrap-around approach for those who attend.

## STEM AMBASSADOR TWILIGHT

STEM Ambassadors offer a unique opportunity to promote careers, industry opportunities and science capital in the classroom. This bespoke session will provide excellent enrichment to the other actions you implement throughout the package.

## EDTECH SUPPORT

Benefit from focussed support for your whole school to adopt new Educational Technologies to support teaching and learning – much of which will already be at your fingertips. Integrating across many processes in your school, this support can take you on a truly transformational journey.

## COMPUTING CPD

Many teachers feel out of their depth when teaching or leading the computing curriculum. Through this package, we can direct you to courses that introduce you to primary computing, teaching and leading within each primary phase and around programming and algorithms subject knowledge. The first teacher per school to sign up to this CPD can gain a bursary, detailed below.

## COACHING

For an additional £300, you can opt-in to 2 coaching sessions for the member of staff who has booked onto the package. This highly individualised opportunity allows for focussed discussion with an experienced facilitator to address areas that may be of more concern or interest to you.

*Optional add-on*

Please contact us for further information on any of the above.
